5. Father was notified by N. Huntingdon Twp. Municipal Auth. that there was no record of our rectory being connected to the municipal sewer system. They were concerned that the rectory may have been connected to a septic tank or emptying into an abandoned mine. We were advised that to correct the problem may be very expensive.

With the help of several parishioners and a master plumber they were able to determine that the rectory was correctly connected to the township system. A broken pipe was discovered and repaired. The only remaining problem is a vent pipe is needed for the kitchen. We have been given time to correct that.

We are very fortunate to have such helpful, knowledgeable parishioners.

God Bless Them !
